

KOPPS has been creating custom-tailored solutions for the special medication needs of physicians, veterinarians and their patients for over ten years.

There is no one-size-fits-all when it comes to medications. Due to factors like metabolism, absorption, cellular transport, and side effects, every patient reacts differently to every medication. With compounding, we can adjust dosage strengths, administration routes, and chemical combinations to customize medications to suit your patients' individual needs and preferences.

We have the ability to produce compounds as capsules, suspensions, solutions, creams, ointments, gels, otic drops, suppositories, injections and more. We can even provide flavored,

preservative-free, and sugar-free medications at the patient's request.

In addition, we have a fully functioning United States Pharmacopeia (USP) 797 compliant ISO Class 5 clean room which features laminar airflow workbenches and a chemo hood, as well as an autoclave machine.

Customizing a patient's medication sends a powerful message. It says you care about the patient as an individual with individual medication requirements, and so do we.

We offer local delivery service, UPS, or you can pick up your compound. Payments can be made either by cash, check, or charge accounts. We accept all major credit cards. In an effort to make our medications more affordable to our patients, we provide universal claim forms which can be submitted to their individual insurance companies.

Feel free to call our compounding pharmacy, **(610) 825-1333**, Monday through Friday between the hours of 9am and 5pm or email us at compounds@koppharmacy.com with any questions or requests.
